belux disk

Design Daniel Kübler

belux disk has a captivating combination of geometrical clarity and dynamic line guidance and relies on the matter-of-factness of round shaping. The homogeneous light made of steel and aluminium is modelled from a single line full of tension. The ground lens deflects and refracts the light and distributes it uniformly in the room. belux disk is switchable and dimmable and is available with Multisens in white, aluminium and chrome. Besides the standard and pendant lamp belux disk is also available as a desk-mounted light to any tabletop and is particularly suitable for integration into the USM Haller table and desk system.

belux disk is now available in LED providing 8590lm of direct and indirect light for 72W.
